Letter of Recommendation

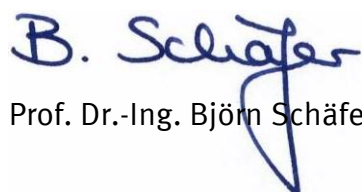

This letter is to certify that Mr. Abhinandan Dinakar successfully completed the Master's programme in Embedded Systems Engineering at Fachhochschule Dortmund University of Applied Sciences and Arts. In the course of his studies, he did a research project and his master's project under my supervision.

The research thesis was entitled "Automotive Software Testing with vVIRTUALtarget Platform", and the Master's thesis was entitled "Ultra-Wideband Radar Technology for In-Vehicle Child Presence Monitoring Systems".

In both projects, Mr. Dinakar explored complex issues with great dedication, gained deep insights, and made a valuable contribution to the respective R&D projects through his work.

I am delighted to recommend Mr. Dinakar, who has consistently demonstrated a strong intellect, unwavering commitment, and a very personable demeanour throughout his time with us. His diligent work ethic and proactive approach have been valuable to us, while his friendly personality makes him a pleasure to work with. Mr. Dinakar is a valuable asset to any organization, capable of delivering high quality results.

I wish him all the best in his career and future endeavours.

Prof. Dr.-Ing. Björn Schäfer
